

Gundog Society of Wales 16th October 2024 Hungarian Wirehaired Vizslas. I really enjoyed judging this breed which I love & have been so involved with since the early 1990s .. A couple of things which are so important to remember and which are so much part of the breed is the size, and that is 58 cm -62 cm for dogs, and bitches 54 cm -58 cm with a variance of less than 3 cm. That means a medium sized dog. And now let's talk tails .. they are meant to be slightly low set and when moving carried horizontally.. High set tails do not come into the breed standard and certainly not waving happily in the air. Saying that I did mostly have really lovely examples of this wonderful breed .. than you all for entering ..I enjoyed going over your dogs very much. PD. 1. Upton's King Fox to Tragus.
